BNMS-50 Mini Mixing Station

The BNMS-50 portable mixing stand is light weight and folds-up and can be carried like a suit case.

The BNMS-50 is designed to be used with a standard five gallon bucket that can be purchased at any home improvement store. When ordered with the BNR-6400 mixer, a timed mix is easy and can run as long as needed.

Mixing materials such as paint, floor overlays, epoxies, drywall mud, and many other products are a great fit for this mixing station. It is ideal for self-leveling materials that require several minutes of mixing.

The stand has a spring loaded post to lift the mixer out of the bucket for easy removal. The kit includes four leveling feet that provide a stable footing and a bucket locking system to prevent the bucket from spinning.

- The stand should be placed on a level dry surface. Uneven surfaces can cause the mixer stand to fall.
- Adjustable legs provide easy leveling.
- For safety, loose clothing should be removed so that it does not get caught in any of the moving parts.
- A proper three prong electrical socket should be used with any mixer to prevent electrical shock.
- Gloves and eye protection must be used when operating this equipment.
- A dust mask should be worn to prevent breathing in dust particles that can be harmful.
