For Immediate Release

New Inverter Generators (2 Styles!) In-Stock and Available from BN Products-USA™

Wickenburg, AZ - **BN Products-USA™** is eager to announce to Distributors and resellers that we now have two additional inverter Generator models to supplement our existing line of quality, portable, gas-powered electrical sources for your jobsite! Take advantage of the electronic throttle adjustment afforded by inverter generators - saving fuel and reducing noise. Both models include a wireless remote-start key fob to provide effortless starting.

The BNG4000iE is an enclosed-frame unit, optimized for quiet operation (64 dBA at 50% Load). Small and lightweight (85 lbs), the BNG4000iE 4-stroke engine outputs 4000W maximum power (3500W rated) for on the jobsite, all in a small and efficient frame. Designed for versatility, the included wheel kit and flexible options offer few limitations for this go-to workhorse!

Using the BNG4000iD gives the advantage of an even lighter, open-frame unit featuring a 4000W maximum output (3600W rated), still with the portability, efficiency, power, and convenience of the enclosed model.

To view additional specs, or to add these generators and other products and tools to your Inventory, please visit our online [Portable Generators page](#), or contact:
