

STAKE HOLDER TOOL SAFETY FIRST

Driving concrete form stakes made easy!

We created the BNFTSH Stake Holder to help cut down on critical hand injuries and promote job site safety. The tool is designed with a long handle and a special spring tension head that can pick up a $\frac{3}{4}$ inch steel stake. The user can hold the stake without touching it. This makes driving stakes far safer and more effective. the user can both position and drive the stake with greater force and accuracy.
