## For Immediate Release

### New JMB-22 #7 Rebar Bending Machine Now In-Stock and Available from BN Products-USA™

Wickenburg, AZ - BN Products-USA™ is excited to announce to Distributors that the newest addition to our extensive line of rebar bending machines, the **JMB-22 #7 Rebar Bender**, is now available and in-stock for purchase and shipping!

This table-style bending machine is a complete, portable package that includes a heavy-duty stand, bending roller set with steel carrying case, and dual foot-pedal controls. Having **two** angle pre-sets with corresponding pedal controls allows users to rapidly repeat two distinct precision-bends at different angles. This is ideal for producing quality rebar stirrups quickly and efficiently - without adjusting controls on the bending machine before bending each bar!

The **JMB-22 #7 Rebar Bender** is an electrical-mechanical bender, designed to bend up to #7 (7/8" or 22mm), Grade 60 rebar, up to 180° in **just 9 seconds**. This machine uses a 115V 50/60Hz 15 amp power supply, compatible with standard power sources.

BN Products-USA™ supplies the construction industry with **Quality Products Engineered with Intelligence and Imagination**, providing specialty tools designed for the Professional Contractor!
