THE MOST TRUSTED NAME IN REBAR TOOLS

DBD-25H

Electric / Mechanical REBAR BENDER

#8 REBAR (1" - 25 mm GRADE 60)

SUMMARY

This heavy-duty rebar bending machine provides safe and efficient rebar bends for Grade 60 rebar up to #8 (1" - 25 mm). The DBD-25H is a 115V AC / 15A table-style electric rebar bender.

This bending machine is suitable for a shop or job site environment. This 210-lb. unit is portable, using front and rear lifting handles. The machine also features an emergency stop button to aid worker safety. This model includes two preset angle locks for 0-180° bends.

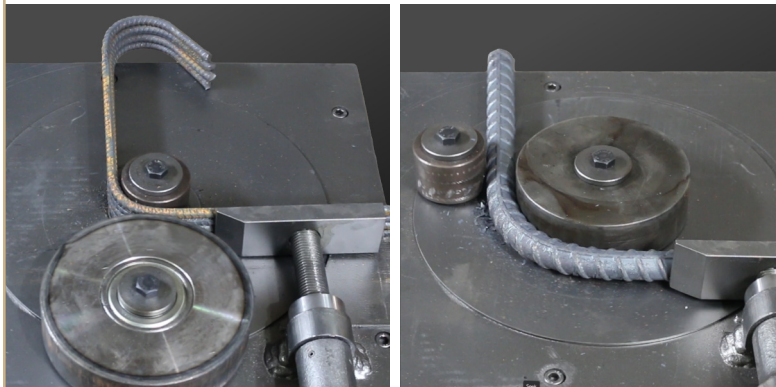

BENDER STAND

An optional stand (BCS-25H) is available from BN Products-USA™ for shop usage or as portability allows, providing a stable base for the machine, at the ideal height.

DIAMOND®
