JMB-22

Electric / Mechanical REBAR BENDER

#7 REBAR (7/8" - 22 mm GRADE 60)

SUMMARY

This heavy-duty rebar bending machine provides safe and efficient rebar bends for Grade 60 rebar up to #7 (7/8" - 22 mm). The JMB-22 is a 115V AC / 15A table-style electric rebar bender.

This bending machine is suitable for a shop or job site environment. This unit is portable, using front and rear lifting handles. This model includes two preset angle locks for 0-180° bends, ideal for bending rebar stirrups. Included foot pedals (2) allow for hands-free bending and repeat bends.

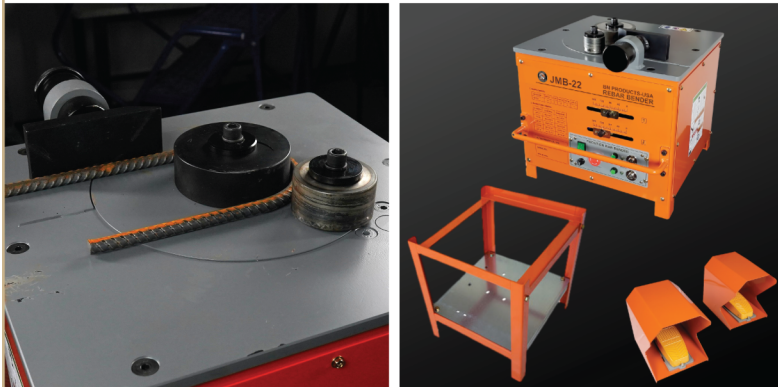

BENDER STAND/STANDARD PARTS

The JMB-22 includes a bender stand at no additional charge. The JMB-22 package includes a bender stand, two pedal controls, five (5) bending rollers in a steel case, and a tool kit.
