JMB-25H

Electric / Mechanical REBAR BENDER

#8 REBAR (1" - 25 mm GRADE 60)

SUMMARY

This heavy-duty rebar bending machine provides safe and efficient rebar bends for Grade 60 rebar up to #8 (1" - 25 mm). The JMB-25H is a 115V AC / 15A table-style electric rebar bender.

This bending machine is suitable for a shop or job site environment. This unit is portable, using front and rear lifting handles. This model includes a preset angle lock for 0-180° bends.

Two included foot pedals (2) allow for hands-free bending.

BENDER STAND/STANDARD PARTS

The JMB-25H includes a bender stand at no additional charge. The JMB-25H package includes a bender stand, two pedal controls, nine (9) bending rollers in a steel case, and a tool kit.
