PRESS RELEASE

DC-32WH2 #10 HYDRAULIC REBAR SHEAR

September 1, 2026

BN Products-USA, LLC., a U.S. supplier of high-quality professional construction tools, has released the 115V DC-32WH2 hydraulic rebar cutter. This powerful shear replaces its first-generation counterpart, the DC-32WH rebar cutter. The DC-32WH2 utilizes a new electric motor and handle assembly, delivering up to 45 tons of hydraulic pressure, that can cleanly cut Grade 60 rebar up to a 1-1/4" diameter (#10 / 32 mm) in just as little as 9 seconds.

Spark-Free Cutting

The DC-32WH2 hydraulic tool is engineered for spark-free rebar shearing, making it ideal for bridge and highway work, or fabrication facilities. The Rebar Cutter features an adjustable stopper that holds the rebar at 90° to the cutting blocks, offering stability and safety.

Ease-of-Use

- The DC-32WH2 includes a comfortable handle and trigger control that's easy to use while wearing safety work gloves. Weighing in at just under 80 lbs., a tool of this power and capacity is surprisingly portable and easy to move around a typical job site.
- Replaceable cutting blocks (set of two) may be rotated up to four times to maximize blade life and efficiency

Safety Features

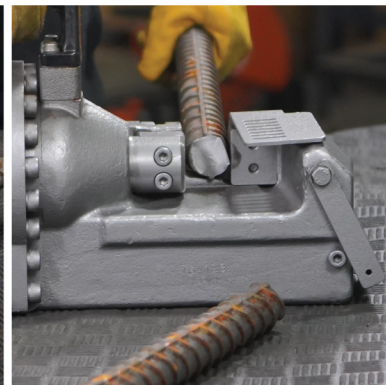

- Built-in safety relief valve for retracting piston
- Protective cutting guard

Trusted Brand

BN Products-USA™ has partnered with IKK Co., Ltd., a Japanese manufacturer of high-quality rebar tools, since 1982. For 45 years BN Products-USA™ and its parent company, Benner-Nawman, have consistently delivered professional-grade rebar cutters and bending machinery to establish BN Products-USA™ as **The Most Trusted Name in Rebar Tools**.

SPECIFICATIONS

Maximum Cutting Diameter	1-1/4" #10 Grade 60 Rebar (32 mm)
Cutting Pressure	45 tons
Maximum Cutting Speed (#10 / 32 mm) Grade 60 Rebar	9 Seconds
Power	115V 50/60 Hz / 18A
Tool Weight	79 lbs. (35.8 kg)
Dimensions L x W x H	23.1" (591 mm) X 7" (180 mm) X 10.6" (272 mm)
