PRO SERIES 3X

CERMET II LONG-LIFE PREMIUM BLADES

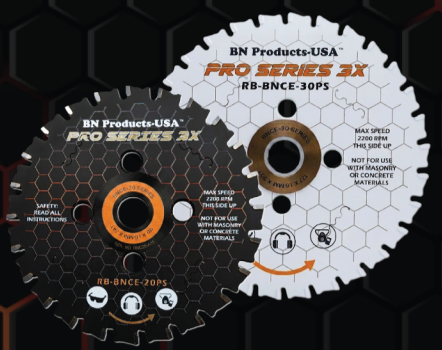

AVAILABLE NOW FOR:

BNCE-20 / BNCE-20C-24V
BNCE-30 / BNCE-30C-24V

CUTTING EDGE SAW™

THE ORIGINAL • BNCE SERIES

BN Products-USA, LLC., a U.S. supplier of high-quality professional construction tools, has released premium blades for the Cutting Edge Saw™. The Pro Series blades feature CERMET II technology, which utilizes ceramic and metallic compounds to harden blade teeth, dispel heat, and extend the life of the saw blades by at least three times over standard titanium carbide-tipped blades.

The Pro Series 3X replacement blades are made in two sizes, designed specifically for the BNCE-20 and BNCE-30 Series Cutting Edge Saw™ multi-material saws (includes standard and cordless models), and are intended as replacement blades for the standard Cutting Edge Saw™ blade, and are not designed as specialty blades for specific cutting applications such as wire mesh or strut. Blades are made available through the BN Products-USA™ distributor network as individual units, or may be sold in packs of five (5) blades for one price.

Product Identification (Part Numbers)

- BNCE-20 / BNCE-20C-24V saws: RB-BNCE-20PS (single), RB-BNCE-20PS5 (5-pack)
- BNCE-30 / BNCE-30C-24V saws: RB-BNCE-30PS (single), RB-BNCE-30PS5 (5-pack)

About the Cutting Edge Saw™

The Cutting Edge Saw™ was debuted in 2011 by BN Products-USA™, as a hand-held power saw to cut steel rebar, all-thread, pipe, conduit, and much more. Unlike abrasive saws and grinders, the Cutting Edge™ saws are a low-RPM, cold cutting saw that chips metal particles rather than kinetic heat, which leaves the cut surface cool-to-touch, and burr-free. Cold saws dramatically reduce sparks when cutting steel, making the saws safer for workers and their immediate surroundings. The Cutting Edge Saw™ was awarded a **Most Innovative Product Award** at 2011's World of Concrete Show in Las Vegas, the largest trade show dedicated to the concrete construction industry.
